

EPA PREVENTION OF MENTAL DISORDERS SECTION REPORT 2020

SECTION COMMITTEE MEMBERS:

Chairperson: Prof. Andrea RABALLO
Co-chairperson: Prof. Dr. Nadja P. MARIC
Secretary: Dr. Liene SILE
Councillor: Prof. Anita RIECHER-RÖSSLER
Councillor: Joachim KLOSTERKÖTTER
Councillor: Petr WINKLER

LAST SECTION COMMITTEE ELECTIONS HELD:

Date: 2018
Venue: Nice / France

ACTIVITIES OF THE SECTION IN 2020:

Meetings/events

EPA section of Prevention of Mental disorders board elections held electronically via e-mails

Description:

The elections were held electronically, and the new board is uploaded on webpage.

From 10 candidates with 14 voters were elected the following board members of EPA section of Prevention of Mental disorders: Chair: Andrea Raballo, Co-Chair: Nadja P. Maric, Secretary: Liene Sile, Councillor: Anita Riecher-Rössler, First other councillor: Joachim Klosterkötter, Second other councillor: Petr Winkler

The Other Businesses included: the Proposals for 2021 EPA congress, the members agreed to apply for one section symposium, one joint symposium with schizophrenia section, one section course.

Location: Virtual elections via-email

Start date: 04/07/2020

End date: 04/07/2020

EPA PREVENTION OF MENTAL DISORDERS SECTION REPORT 2020

Title: Early intervention in Psychosis: Working as a team and involving families

Description:

Course Director: Merete Nordentoft (Denmark)

Course Description: EARLY INTERVENTION – A KEY FEATURE OF PSYCHIATRY IN THE FUTURE. Mental illness is associated with high burden of disease and it has severe individual and societal consequences. It will be of immense value to be able to intervene in risk groups identified before onset of psychosis and other severe psychiatric disorders.

In first episode psychosis, early Intervention services with team-based intensive case management and family involvement are superior to standard treatment in reducing psychotic and negative symptoms and comorbid substance abuse and improving social functioning and user satisfaction. As an introduction, the results of the OPUS-trial will be presented together with meta-analyses based on similar trials.

The basic principles for working in an early intervention team will be presented and discussed. Involving families is a cornerstone in early intervention. Family involvement can be in many different formats, depending on the needs and preferences of the patients and the relatives. The multifamily group approach will be presented with vignettes and tried out in role plays. The implementation of OPUS all over Denmark will be presented together with the Danish OPUS-fidelity study.

Location: Virtual EPA congress

Start date: 04/07/2020

End date: 04/07/2020

FUTURE ACTIVITIES:

Meetings/events

Section Zoom meeting

Description:

Last Meeting Follow-up

There are some struggles with section organizational works due covid-19 situation, nevertheless section remains active in programme proposals for EPA 2021

EPA PREVENTION OF MENTAL DISORDERS SECTION REPORT 2020

There are publications released from section members, as well as individual activities which are still important in frames of section scope.

New Business

To be more flexible in times of online learning, conferences- to develop tools in internet version to be available for anyone interested in mental health.

To start developing the tool for specialists about Psychosis and early intervention (something like text-book, but interactive based in internet with possibility for section members to edit the text and rewrite it in national language).

To think about proposal for an MOOC with a focus on psychotic disorders.

Discussion about new survey for a publication- the main objectives include real available training for a resident of psychiatry across the different European countries. This publication could be a fundament for a developing the educational material for psychiatrist- as a key elements and main topic to know about psychotic disorders and their treatment.

Continue a collaboration with other sections (for e.g. Section of schizophrenia).

Also there were three individual activities from section members which were mentioned as important for section:

- 1) EPA Section of Prevention of Mental disorder Councillor RIECHER-RÖSSLER Anita, Has received award of highly cited researcher of Web of Science in 2020 in the field of psychiatry and psychology <https://publons.com/researcher/4045487/anita-riecher-rossler/>
- 2) EPA Section of Prevention of Mental disorder Councillor Petr Winkler is one of the founder of the web-based project www.mymentalhealth.guide and www.samopomo.ch - a nation-wide effort to increase population mental health literacy (i.e. knowledge and skills to obtain and maintain good mental health, understanding mental disorders and their treatment, decreasing stigma related to mental disorders, and enhancing help-seeking).

EPA PREVENTION OF MENTAL DISORDERS SECTION REPORT 2020

3) EPA Section of Prevention of Mental disorder Secretary Liene Sile is voluntated and started the initiative with leading only existing Balint group in Latvia for doctors working in COVID-19 internal medicine, intensive care and reanimation units.

End date: 26/02/2020

Preventing the "Hype, Hope and Disappointment" Cycle in Early Intervention of Psychosis

Description:

Chair(s) A. Raballo, Italy; L. Sile, Latvia

Session Description

Proposed by the EPA Section on Prevention of Mental Disorders - Early intervention in Psychosis is one of the most dynamic and original areas in contemporary mental health for several interrelated reasons. Indeed, in the last two decades EIP has been a tremendous catalyzer for research, service-reform and concept-innovation in the broader field of psychiatry. However, as every innovative paradigm, EIP has entered a maturity phase in which reconceptualization of goals, strategies and opportunities to solve wide-scale, real-world problems are mandatory. This symposium will offer a critical, multilateral over-view of the EIP field, capitalizing on the contribution of leading international clinicians and researchers who have a direct, plurennial experience in the field. The symposium proposal is a collegial expression of the EPA Section of prevention of mental disorders.

Location: EPA congress 2021

Start date: 11/04/2021

End date: 11/04/2021

Early Intervention in Psychoses: Assessment and Treatment to Improve Functional Outcome

Description:

Chair(s) A. Mucci, Italy; A. Raballo, Italy

EPA PREVENTION OF MENTAL DISORDERS SECTION REPORT 2020

Session Description

Proposed by the EPA section on Schizophrenia and Prevention of Mental Disorders - Psychotic disorders and particularly schizophrenia are severe mental illnesses which typically emerge during adolescence and young adulthood. This symposium will address two important components of early intervention aiming at improving functional outcomes in schizophrenia and other psychotic disorders, namely timely assessment and treatment. Briefly, Prof. Mucci (Italy) will discuss functional impairment in recent-onset schizophrenia spectrum disorders, Prof. Glenthøj (Denmark) will focus on early assessment of negative symptoms and related treatment strategies. Then Prof. Thorup (Denmark) will illuminate the often-neglected aspect of Family high risk populations and their value for the purpose of early intervention. Finally, Prof. Rancans (Latvia) will present a critical overview of the treatment of schizophrenia from a real world perspective.

Location: EPA congress 2021

Start date: 12/04/2021

End date: 12/04/2021

Working as a team and involving families

Description:

Course Director: Merete Nordentoft, Denmark

Mental illness is associated with high burden of disease and it has severe individual and societal consequences. It will be of immense value to be able to intervene in risk groups identified before onset of psychosis and other severe psychiatric disorders. In first episode psychosis, early Intervention services with team-based intensive case management and family involvement are superior to standard treatment in reducing psychotic and negative symptoms and comorbid substance abuse and improving social functioning and user satisfaction. As an introduction, the results of the OPUS-trial will be presented together with meta-analyses based on similar trials. The basic principles for working in an early intervention team will be presented and discussed. Involving families is a cornerstone in early intervention. Family involvement can be in many different formats, depending on the needs and preferences of the patients and the relatives. The multifamily group approach will be presented with vignettes and tried out in role plays. The implementation of OPUS all over Denmark will be presented together with the Danish OPUS-fidelity study.
