EPA CULTURAL PSYCHIATRY SECTION REPORT 2021

A glance was offered on EPA-Section of Cultural activities in the last year, including those which took place at the last online edition of the EPA Congress 2020. Iris Graef-Calliess briefly presented the conferences organized, during 2020, by some members of the section (Supporting Refugees' Mental Health at THL's headquarters in Helsinki, Finland, on 11-12 December 2019, Plotina Final Conference in Bologna Italy on 27-28 January 2020, "La nuova mission della psichiatria sociale", virtual congress organized by the Società Italiana di Psichiatria Sociale (SIPS) on 26-28 October 2020).

Ilaria Tarricone presented some results about Italian research on Cultural Proficiency among nurses employed in Center Mental Health Services of Emilia Romagna, Italy. From the results of questionnaires administered to 130 nurses, emerged that Males nurses were more skilled in Cultural Proficiency. Also, foreign nurses present higher scores than native ones in cultural competencies.

Iris Graef-Calliess resumed the outcomes of the Section Coordination meeting of 6th October 2020. Coordinator Members stressed the importance of increasing the visibility of EPA sections, through many forms of contributions, such as online newsletters, articles for EPA Journal, a collaboration between the EPA section and the national psychiatric association.

Levent Küey talked about the Ebook entitled "Risk Management of Terrorism Induced Stress" that presents papers delivered at the NATO Advanced Research Workshop (ARW) Risk Management of Terrorism Induced Stress – Guidelines for the Golden Hours (Who, What and When) held in Odesa, Ukraine, from 16-19 September 2018. Inside the Ebook, there is a chapter written by Prof Levent Kuey, entitled "Forcibly Displaced People (Internally Displaced People, Refugees, Asylum Seekers) and Their Mental Health Situation" of which he will send a pdf file to the members of the section.

Report on section coordination meeting 2021

It was stressed the importance of interactive symposium, collaboration among the sections, creation

of task force of the section to improve visibility and importance of the section.

Session Description

Organised by the EPA Section on Cultural Psychiatry. Adolescence is a time of considerable neuronal growth and

psychosocial change, and in the context of migration can be particularly challenging for mental health care. This

workshop will explore some of the more complex intersections of adolescence, immigration, and mental health,

EPA CULTURAL PSYCHIATRY SECTION REPORT 2021

including gender, trauma, migration status. Effective psychiatric care of adolescents requires specialization,

however, this specialization, for the most part, is monocultural and predicated on "Western" social and cultural

norms. To that end this workshop will consist of brief presentations on some of the key issues related to adolescence and migration and interactive discussions in which participants can share questions and strategies

used to both understand and to treat young people with immigrant backgrounds in general and unaccompanied

migrant youth in particular
