

EPA FORENSIC PSYCHIATRY SECTION REPORT 2021

SECTION COMMITTEE MEMBERS:

Chairperson: Prof. Dr. Kris GOETHALS
Co-chairperson: Dr. Ellen VAN LIER
Secretary: Prof. Dr. Kolja SCHILTZ
Councillor: Dr. Vicente TORT HERRANDO

LAST SECTION COMMITTEE ELECTIONS HELD:

Date: September 2020
Venue: Online

ACTIVITIES OF THE SECTION IN 2021:

Meetings/events

EPA virtual conference 2021

Description:

Symposium: On a level playing field with forensic patients?

Chairs: Birgit Völlm, Michael Wise

Lived experience roles in forensic in-patient treatment, Gerard Drennan

Implementation of a peer support worker in a forensic hospital in Germany, Peggy Walde

Oh what a tangled web we weave when first we practice to deceive..., Michael Wise

Prison psychiatry and faking symptoms, Vicenc Tort Herrando

Location: virtual conference

Start date: 11/04/2021

End date: 11/04/2021

CME-course: Risk assessment and risk management in violent patients in general psychiatry

Description:

EPA FORENSIC PSYCHIATRY SECTION REPORT 2021

The course provided the knowledge and research results about the risk of psychiatric patients of becoming violent and of becoming offenders with violent crimes. It focused on the indicators of risk for violence and delinquency but also on the indicators of immediate threat and imminent aggression on wards and in outpatient settings. It taught on how to develop a structure in the assessment and to come to a professional judgment on the severity and on the imminence of risk. It also taught on risk formulation and risk communication among staff and outside of the clinicians' surroundings (relatives, police, courts, caretakers). It addressed risk management, when to intervene and how, the methods of prevention and the long term guidance of risky patients.

Location: EPA2021 (Online)

Start date: 10/04/2021

End date: 10/04/2021

FUTURE ACTIVITIES:

Meetings/events

EPA conference June 2022

Description:

EPA course 06: Risk assessment and risk management of violent patients in general psychiatry

Director: K. Goethals (Belgium)

Co-director: K. Schiltz (Germany)

Organised by the EPA Section on Forensic Psychiatry. The course will provide the knowledge and research results about the risk of psychiatric patients of becoming violent and of becoming offenders with violent crimes. It will focus on the indicators of risk for violence and delinquency but also on the indicators of immediate threat and imminent aggression on wards and in outpatient settings. It will teach on how to develop a structure in the assessment and to come to a professional judgment on the severity and on the imminence of risk. It will also teach on risk formulation and risk communication among staff and outside of the clinicians' surroundings (relatives, police, courts, caretakers). It will address risk management, when to intervene and how, the methods of prevention and the long term guidance of risky patients.

Location: Budapest

Start date: 04/06/2022

End date: 04/06/2022

Attendance: 25

EPA FORENSIC PSYCHIATRY SECTION REPORT 2021

Symposium 31: forensic aspects in old age psychiatry

Description:

Organised by the EPA Sections of Forensic Psychiatry and Old Age Psychiatry. Old age forensic psychiatry encompasses a broad variety of issues. Psychiatrists may be asked to assess elderly individuals' competency or capacity for decision making or activities that may pose a risk to themselves or others, such as living independently. Aging persons can also become involved in the criminal justice systems, more commonly as victims but also as offenders. In this symposium, two papers will be presented from the victim's perspective (sexual abuse and violence, and homicide-suicide). Next, two papers will be presented from the offender's perspective (problematic behaviours, such as disinhibition, agitation and aggression, and criminal behaviour, and prison psychiatry for aged offenders).

Location: Budapest

Start date: 04/06/2022

End date: 04/06/2022

Attendance: 30

Adult patients with ADHD at the interface of general and forensic psychiatry

Description:

Organised by the EPA Sections on Forensic Psychiatry and Neurodevelopmental Disorders Across the Lifespan (NDAL). Hyperactivity and impulsivity are among the most important personality or individual difference factors that predict later offending. Hyperactivity tends to persist into adolescence, but may continue into adult life. It is associated with restlessness, impulsivity and a short attention span. Individuals with ADHD may also have poor ability to defer gratification and a short future time perspective. In this symposium, knowledge and experience from different European countries will be presented from a variety of perspectives, such as ADHD and intimate partner violence, and ADHD and treatment implementation in prisoners and other forensic psychiatric settings.

Location: Budapest

Start date: 04/06/2022

End date: 04/06/2022

forensic psychiatry section meeting

Description:

EPA FORENSIC PSYCHIATRY SECTION REPORT 2021

Annual meeting of paid members of the section. Agenda to be announced.

Location: Budapest
Start date: 07/06/2022
End date: 07/06/2022
Attendance: 20

Controversial issues, potential risks and solutions in telepsychiatry

Description:

Organised by the EPA Section on TeleMental Health. Telepsychiatry, an aspect of digital psychiatry, is rapidly being adopted throughout the world as a solution for disparities in access to mental health care. Its spread has been significantly accelerated a consequence of measures taken to combat the COVID-19 pandemic. Whilst the evidence supports the use of telepsychiatry in clinical practice, clinicians have often started from a base with little or no specific training. The skills required for effective telepsychiatric care are distinct from our practices in the traditional clinic, face-to-face; adaptation of our usual practices are required to achieve optimal outcomes. The current situation may pose new risks, and there are controversies. The workshop aims to provide the audience with up-to-date techniques and information on the more important issues in telepsychiatric care, delivered by European experts in managing psychosis, suicide risk, substance misuse, transition psychiatry, care of the elderly, and forensic issues.

Location: Budapest
Start date: 07/06/2022
End date: 07/06/2022
Attendance: 50

Summer seminar on forensic psychiatry and psychology in Europe

Description:

Annual summer seminar, theme this year: Death in forensic psychiatry

Location: Irsee, Germany
Start date: 01/08/2022
End date: 05/08/2022
Attendance: 25

EPA FORENSIC PSYCHIATRY SECTION REPORT 2021

Ghent group meeting

Description:

See website: www.ghentgroup.eu

Location: Irsee, Germany

Start date: 22/09/2022

End date: 24/09/2022

Attendance: 30
