LAST SECTION COMMITTEE ELECTIONS HELD:

Date: 2022
Venue: Virtually via emails

ACTIVITIES OF THE SECTION IN 2022:

Meetings/events

EPA Section Meeting 2022

Description:

The video call was organized to discuss the elections of section- new aims and tasks. Also there were discussed the new programme of EPA 2023 and submission of symposiums and workshop (from the section, as well as joint symposiums with other sections). The brainstorming included the idea of collaboration with NGO (if it will be possible) in projects in mental health awareness rising- local and regional level.

Location: Zoom conference call

Start date: 14/06/2022

End date: 14/06/2022

Attendance: Liene Sīle, Winkler Petr, Andrea Raballo, Nadja Maric Bojovic, Anita Riecher-Rössler

Early Intervention Through Real World Experiences: Feedback, Challenges and Opportunities

Description:

Chair(s) Liene Sīle (Latvia) and Andrea Raballo (Italy)

Organised by the EPA Section on Prevention of Mental Disorders.

During the last decades there has been a wide discussion in scientific literature about the effectiveness of early intervention, with many aspects where early intervention has been shown to be a more effective treatment option than standard care. The core philosophy of early intervention treatment includes multi-professional teamwork. In this workshop we aimed to present examples from different countries with different health care systems and different resources for mental health care- how they manage to build and integrate early intervention teamwork.

The speakers will guide the audience through their journey of clinical and organizational work with patients with first-episode psychosis. During the symposium we will cover treatment for all important stages of first-episode psychosis: from early detection to treatment in acute psychosis wards, and afterwards follow-up and prevention from second psychosis in early psychosis programs in community or out-patient care. At the end of the workshop there will be time for educational, motivational, and encouraging discussions with specialists whose work includes clinical work and who have gained excellent experience which is complimented with active work in psychosis research.

Location: 2022 EPA Congress, Virtual

Start date: 07/06/2022

End date: 07/06/2022

Attendance: Congress Participants

The Early intervention of psychosis: Working as a team and involving families

Description:

Course Director: Merete Nordentoft, Denmark
Organised by the EPA Section on Schizophrenia.

The early phases of psychosis have been hypothesized to constitute a critical period, a window of opportunity. At the same time, the early phases of psychosis are associated with increased risk of unwanted outcome, such as suicidal behaviour and social isolation. This was the background for the emergence of early intervention services, and in Denmark, the OPUS trial was initiated as part of that process. Now there is convincing evidence for the effectiveness of early intervention services from trials all over the world- The different elements in early intervention services will be presented together with the principles for involving families. The psychoeducational multifamily treatment model will be presented. questions to the audience will be included in the presentations. there will be role play demonstrating the problem-solving method.

Location: Virtual EPA congress

Start date: 06/06/2022

End date: 06/06/2022
